ENGLISH

This week we will be working on the Young Author's project. Most of the work should be completed in school. It is important as we work on this project that the kiddos utilize their class time wisely.

MATH 1

We will continue working with fractions & reducing them to lowest terms. We will also order fractions & decimals. We will have a quiz over these lessons next week.

MATH 2

At the beginning of the week we will focus on understanding proportions, cross-products & scale drawings. We will have a quiz over the first 5 lessons on Thursday & wrap up the week with percents, fractions & decimals.

Math 3

We will work on solving $-/+/x/+$ equations. We will have a checkpoint quiz on Thursday & wrap up the week reviewing exponents.

READING

This week we will finish up the Natural Environment Reports that the students worked on all last week. They are due Thursday, typed or written in blue or black ink with the outline and rough draft stapled to the back. The set 15 quiz will be on Tuesday, and we will be finishing

up Unit 4 with a test on Quia Friday.

RELIGION

This week will consist of working on the prayer Act of Hope. The students begin presenting their Sacrament Game Shows on Monday, so make sure to have all materials needed at school the day you are scheduled to present. There will be no make-ups! The schedule of presentations is listed on my resource page with the groups.

SCIENCE

Last week we worked in cooperative groups to discuss resources in our community. We will continue our study on renewable and non-renewable resources.

SOCIAL STUDIES

We will begin to look at early colonization of the new world. This week we will focus on the Spanish colonies & the early English settlements. We will look at the reasons why they settled where they did. We will also talk about building Jamestown & assigning groups.
