ENGLISH

This week we will continue to study subject and predicates. In addition to diving into subjects and predicates, editing and proofreading of other's work will be a focus. This step of the writing process is key to successful writing.

ALL MATH PERIODS

All math classes will work with the divisibility by 5 rule this week (all numbers that end in 0 or 5 are divisible by 5). There will be a quick quiz on Friday.

MATH 1 & 2

We will be working on comparing & ordering with decimals as well as estimating with decimals. There will be a quiz on Wednesday over lessons 1 & 2.

MATH 3

We will be reviewing rounding, adding & subtracting of whole numbers. There will be a quiz Friday.

READING

This week we will take our first Vocab-toon Quiz on Monday!!! Remember that flash cards are a bonus point so don't forget to turn them in before the quiz. We will be continuing working in the text this week reading about nature's fury. We will be focusing on the skills of making predictions and inferences. We will also begin taking notes for writing description paragraphs.

RELIGION

This week we will be studying the server packets in depth so we can impress Mr. Willis while also getting ready for the

upcoming quiz. (not yet scheduled) We will also be learning in our textbook what it means to be stewards.

SCIENCE

Note taking is a crucial skill that the 5th graders will be working on during the upcoming weeks. During class we are spotlighting how and where to find the important information and what to write in the notes. Also, since we are studying cells, each student will create their very own cell creation. Look for more information to come home with your child this week.

SOCIAL STUDIES

This week we will be creating a geographical terms dictionary in our interactive notebooks. We will also be reviewing for an upcoming quiz over the notes we have taken. On Tuesday, the kiddos will be taking a map quiz on the seven continents & four oceans.
